Measurability

NNC ESG FRAMEWORK

1. FARM/FOREST PROFILE
   - Quantitative Data on Farm Inputs / Outputs / Application

2. CODE OF PRACTICE
   - Practice + verification criteria to measure implementation of sustainable farming practices

3. KPIs
   - Aggregated data to measure performance and risk

Enables us to

CAPITALIZE ON NEW OPPORTUNITIES

- Farmland and timber as an opportunity to:
  - help mitigate against climate change through soil carbon sequestration
  - provide natural capital ecosystem benefits

MANAGE ESG ON THE GROUND

- Water Use and Pollution
- Land Use
- Biodiversity impacts
- Human and labor rights
